

Project Profile

Water Storage:

Fire Protection

Location:

United States, Lund, Wisconsin

Precaster:

Wieser Concrete Products

The Situation:

To provide a fire protection water holding tank for the city of Lund a twin, precast concrete tank system was used to hold water. Since these tanks are designed specifically for holding water, a watertight seal had to be used to seal the joints of these tanks.

The Solution:

To provide the watertight joints, CS-102 was used. CS-102's watertight qualities allow for the fire protection tank to be efficient.

Sealant Application

Water Holding Tank

Applicable Industry Standards:

ASTM C-990

Products Used:

ConSealTM
CS-102
Butyl Rubber Sealant

Don't Just Seal It, ConSeal It!
